

# HARROWS

Design Collection  
2023

Photography: Simon Devitt

Made for  
social spaces.

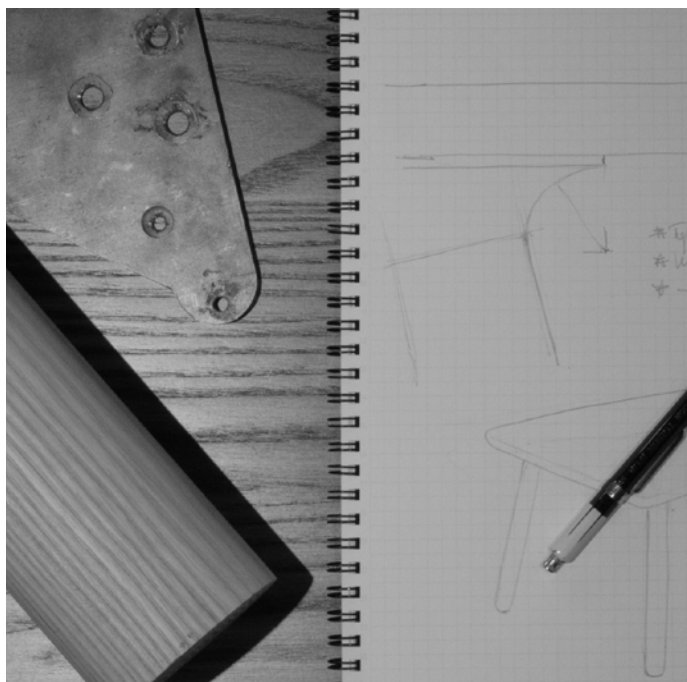

## **Why we do it.**

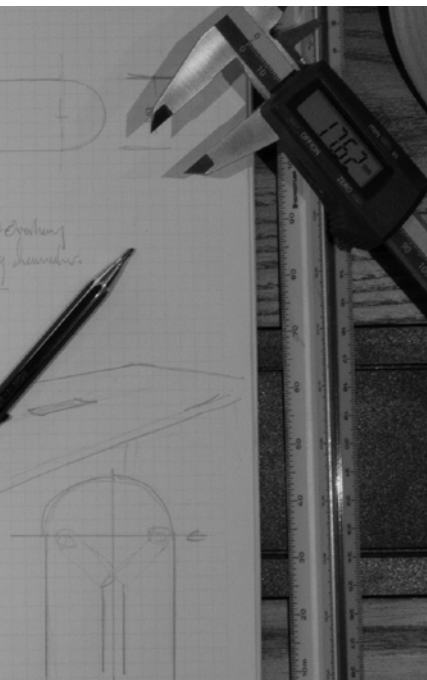

We believe that society is built around the interaction of people. We fill spaces with thoughtfully crafted furniture to facilitate these interactions.

# We are creatives.

For us good design offers a solution,  
looks beautiful and is sustainable to create.  
Without this we see no point in creating.

# **We are craftspeople.**

We are a family-owned business of third generation furniture makers. We use only the highest quality materials and combine time honoured craft with cutting edge technology to make beautiful product that lasts.

We see sustainability as an ever-evolving challenge. We are constantly innovating to reduce waste and minimize our impact on the world around us.

### **Sustainable Design**

When the objects around us are inclined to lose value, Harrows have set out to create beautiful and sustainable products that add value to their environment for years to come. Products with social relevance and timeless design principals, made from quality materials and built to last.

### **Bio-based Focus**

Harrows products are largely constructed from bio-based materials, and we focus on making sustainable choices and looking for sustainable alternatives. The timber used in our manufacturing is sourced from certified sustainably managed forests.

### **New Zealand Made**

Wherever possible we produce our furniture in our own factory in Timaru, to minimise both international and local freight volumes. Manufacturing inhouse also gives us full control and transparency over the quality and origin of all materials.

### **Refurbishing**

We believe in circularity. Alongside our passion for making beautiful products designed to last, we acknowledge that requirements for interior spaces will change and evolve over time, as will their furniture needs. With majority of our range being manufactured or finished on site, these can be refurbished, initiating a fresh life cycle for the product with minimal waste.

### **Reducing Consumption and Waste**

Our consumption and waste reduction initiatives include freighting in kit set where ever possible to reduce freight miles; blanket wrapping in transport to reduce packaging; separating and recycling cardboard and soft plastics; returning upholstery foam offcuts to the manufacturer for reconstitution; improving the efficiency of material consumption through research and development, and selecting sustainable or recyclable materials wherever possible.

# Made for life.

At Harrows we believe in sustainability and responsible manufacturing.

Latest technology and time-honoured craft go hand in hand to create products that bring people together and are designed with longevity in mind, extending the useful life and in turn reducing waste.

## **Global GreenTag<sup>Cert™</sup> GreenRate<sup>™</sup> Certification.**

A range of Harrows' own NZ Made designs carry Global GreenTag<sup>Cert™</sup> v4.0 GreenRate<sup>™</sup> Level C certifications.

A Third Party Product Certification Scheme, GreenRate is recognised in the Green Star<sup>®</sup> tools with the New Zealand Green Building Council (NZGBC) and GBCA in Australia, by HomeStarNZ<sup>®</sup>, and compliant with specific IWBI<sup>®</sup> WELL<sup>™</sup> features under V1.0 and v2.0.

## **Carbon Footprint Certification.**

Harrows are proud to have measured the carbon footprint of our business operations with Ekos for the 2021-22 financial year, and is committed to strategically reducing them.

## **Forest Stewardship Council<sup>®</sup> (FSC<sup>®</sup>)**

Harrows obtained FSC<sup>®</sup> certification in 2015. FSC<sup>®</sup> helps take care of forests and the people and wildlife who call them home.

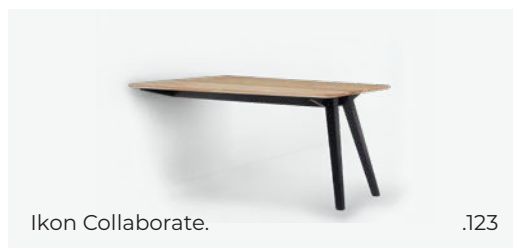

A black and white photograph of a person working in a workshop. The person is in the center, slightly out of focus, wearing a light-colored shirt and dark pants, and is working on a piece of wood on a workbench. In the foreground, on the left, there is a sharp, clear stack of several wooden planks. The background is filled with various workshop equipment and materials, all of which are blurred, creating a sense of depth and focus on the person and their work. The text "Harrows designed, Harrows made." is overlaid on the right side of the image in a white, sans-serif font.

Harrows  
designed,  
Harrows  
made.

# Link.

A beautiful and multifunctional system  
for spacial management.

**Best Design Awards  
Winner 2022**

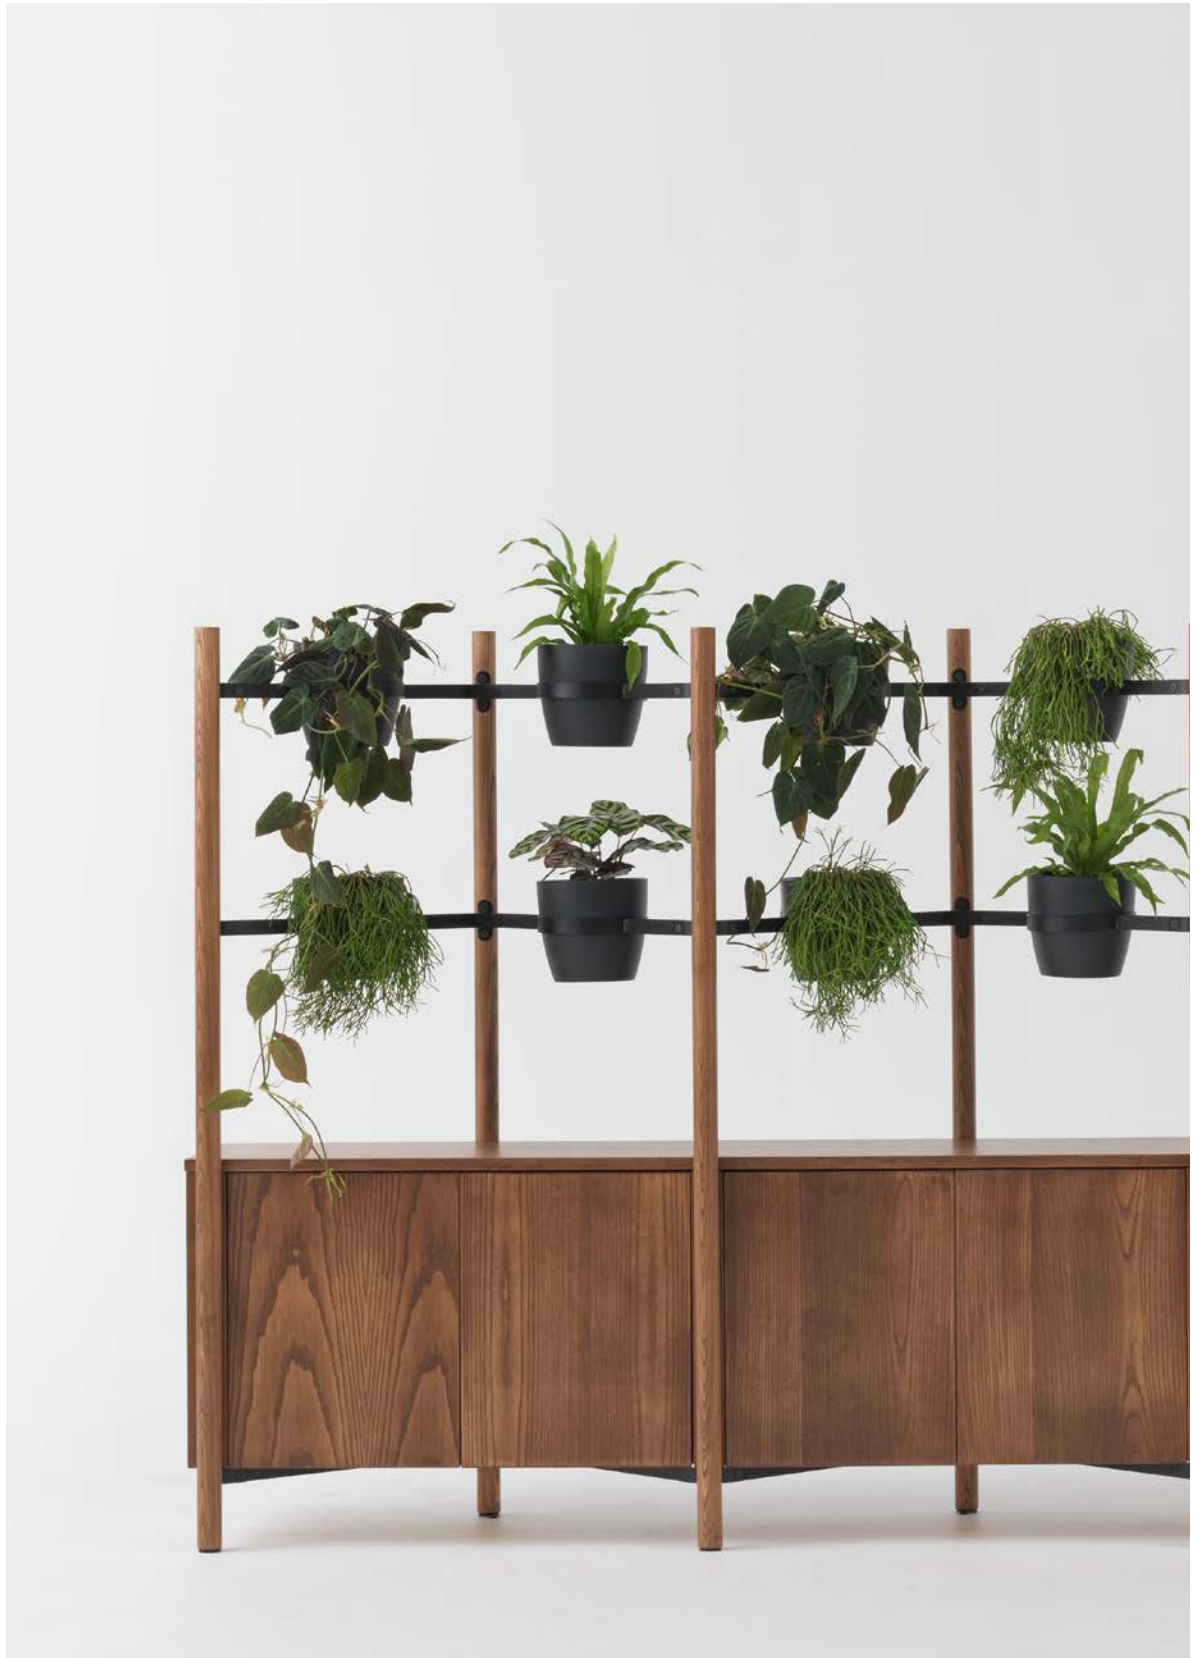

# Link.

Rethink how you manage the delineation of space with the endless possibilities of Link.

From a standard range of heights and lengths the Link Display System allows you to select the layout and function of each section from a full range of accessories. At any stage, shelving and planters can be swapped and rearranged, even flipping the shelves to face the opposite side, meaning the shelving system can adapt and evolve to a changing interior well after installation.

# Finishes and Options.

The Harrows model allows for personalisation.

The Harrows Design collection is manufactured exclusively by Harrows' own team of skilled craftspeople and complemented by chair and stool frames sourced from selected partners.

From painting, polishing, powder coating through to upholstery, each finishing process on all Harrows products are completed in our own factory.

## Manufactured to order.

All product is manufactured or finished to order, allowing for options such as power and cable management, and in some cases sizes and edge details, to be specified for each particular project.

As well as allowing customers a high level of personalisation, this model gives complete control over the quality and origin of materials used and helps us to maintain the unbending standard of quality that we at Harrows strive for.
