## RELIEF BANQUETTE

An overstated banquette seat for impact and presence.

The Relief Banquette is visually exciting with exaggerated features for impact. Generous upholstered squabs create an interesting colour blocking opportunity, with a feature lip and amplified overhang on the front and ends. Select from two standard back options, low back and high back. The pitch of the seat and back have been ergonomically considered for activities like eating, drinking and working.

The overhang allows the user to slide in and out of the banquette easily and provides a comfortable sitting position while dining.
