1440 x 1540 x 1380h

New Zealand made.

Designed and manufactured in New Zealand by Harrows the Method Focus range is made to order and finished to suit any interior. Manufacturing inhouse gives full control and transparency over the quality and origin of all materials.

Functional, flexible and inviting.

The Method Focus collection is a functional extension of the Method Seating System. Build out the perfect work environment with modular pods, alcoves, lounges and accessories.

Cable access slot in top.

Fast-charge USB and power outlet.

3 worktop materials and multiple colour options for each.

Removable cable management covers in each corner for sleek flexibility.

Method + Sustainability.

Sustainable design.

When the objects around us are inclined to lose value, Harrows have set out to create beautiful and sustainable products that add value to their environment for years to come. Products with social relevance and timeless design principals, made from quality materials and built to last.

Bio-based focus.

Method, like majority of the Harrows collection, has been constructed from bio-based materials where possible. We focus on making sustainable choices and looking for sustainable alternatives. The timber used in our manufacturing is sourced from certified responsibly managed forests.

Reducing consumption and waste

For Method, our consumption and waste reduction initiatives include returning foam offcuts to the manufacturer for reconstitution; recycling fabric offcuts, improving the efficiency of material consumption through R&D and selecting sustainable or recyclable materials wherever possible.

Made for life.
