# Finish your space beautifully.

Mesa is 100% NZ-made, designed and crafted in our own manufacturing facility in South Canterbury. Our in-house manufacturing gives you as the designer an exceptional degree of creative control.

Choose your top material and colour, and powder coat the frame to suit.

## Ash Veneer Stain Options.

## HPL over Birch Ply Options.

## LPL Colour Options.

Mesa tops are available in all standard LPL finish options.

## Dulux PG288 Industrial Powder Coat range.

## Dulux Protecture™ - textured range.

## Finish Options.

HARROWS

MADE FOR SOCIAL SPACES

# Made for life.

At Harrows we believe in sustainability and responsible manufacturing.

Latest technology and time-honoured craft go hand in hand to create products that bring people together and are designed with longevity in mind, extending the useful life and in turn reducing waste.

# Harrows + Sustainability.

We see sustainability as an ever-evolving challenge. We are constantly innovating to reduce waste and minimize our impact on the world around us.

#### **Sustainable Design.**

Mesa is a collection with social relevance and timeless design principals, made from quality materials and built to last. When the objects around us are inclined to lose value, Harrows have set out to create beautiful and sustainable products that add value to their environment for years to come.

#### **New Zealand Made.**

Being 100% NZ-made means choosing Mesa minimises international freight volumes and supports local all while giving you full control and transparency over the quality and origin of all materials.

#### **Circularity.**

We believe in circularity. Alongside our passion for making beautiful products designed to last, we acknowledge that requirements for interior spaces will change and evolve over time, as will their furniture needs. With Mesa being manufactured onsite, it can be refurbished, initiating a fresh lifecycle for the product with minimal waste.

#### **Reducing Consumption and Waste.**

Mesa is blanket wrapped and freighted in kitset to reduce freight miles and packaging. Our product team works to improve the efficiency of material consumption through research and development, and selecting sustainable or recyclable materials wherever possible.
