MADE FOR SOCIAL SPACES

HARROWS

Exceptional craftsmanship.

Karaka is designed for those who know what they want.

Offering a high level of craftsmanship, distinct style and the ability to personalise. Craft a space where people come together to share stories and forge relationships.

Product may vary.

Stocked in raw and finished in New Zealand, Karaka offers the opportunity to choose personalized finishes that breathe life into your vision. No one space has to be like the other.

Customise colours, fabrics and finishes for each project.

MADE FOR SOCIAL SPACES

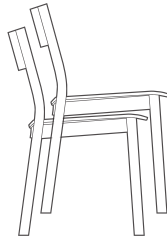

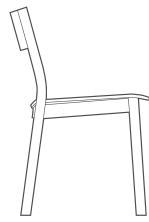

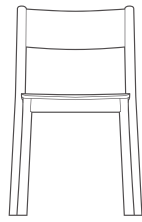

Karaka.

The Karaka is manufactured in Italy from European Ash. Raw stock is held by Harrows to allow for personalisation.

The chair stacks up to 6 high, even when upholstered.

Karaka is also available with FSC certification on request.

MADE FOR SOCIAL SPACES

HARROWS

It's personal.

The Harrows model allows for personalisation.

Designed by Harrows and manufactured in Italy, the Karaka Collection is a collaboration of innovation and quality.

With our in-house manufacturing, we maintain complete control over the quality and origin of all materials used. This enables us to uphold the uncompromising standard of quality that Harrows is renowned for.

Embrace the ability to tailor the Karaka Collection to enhance the storytelling within your space.

HARROWS

Karaka + sustainability.

We see sustainability as an ever-evolving challenge. We are constantly innovating to reduce waste and minimize our impact on the world around us.

Sustainable design.

When the objects around us are inclined to lose value, Harrows have set out to create beautiful and sustainable products that add value to their environment for years to come. Karaka is a product with social relevance and timeless design principals, made from quality materials and built to last.

Embracing natural resources.

Karaka is manufactured from European Ash and is available with FSC® certification.

Timber is known for its durability and longevity. When wood products are harvested and used in the construction of furniture, the carbon is effectively “sequestered” or locked away from the atmosphere for a long period of time.
